

NUTRAMINERALS (Key Minerals for poultry)

Regular dietary requirements of animal feed.

It Contains Zinc, Manganese, Iron, Copper, Selenium & Iodine with hydrolyzed protein (Amino Acids).

Minerals boost up their physiological & biological metabolism.

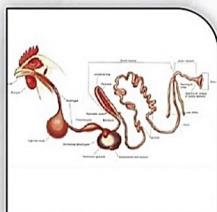

ADVANTAGES

- ◆ Essential for growth, reproduction and milk production
- ◆ Good source of minerals in bio-available form

NECROZYME

Protease against "necrotic enteritis"

Undigested nutrients enter the small intestine and lead to microbial growth of *C. perfringens*, which favor this nutrient-rich environment and lead to necrotic enteritis.

- ◆ Synergy combinations of bromelain+papain+ neutral protease+fungal protease as key preventive measure to digest all proteins.
- ◆ Highly stable protease activity.

NATURAL EGG SHELL STRENGTHENER (NESS)

NESS contains Elastin, Chondritin Sulphate, HA Collagen Type I, II, III, V, XI, XXIV, XXVII, To be added with regular calcium at 1Kg/1000 Kg of feeds Glycoaminoglycan and fibrous protein

Advantages

Strengthen bone, joint and improve the skeletal growth.

- ◆ Produces rigid, strong and best quality eggs.
- ◆ Protect from egg breakage. ◆ Boost overall immunity.

Production Technologies are Developed by
MICROCORE RESEARCH LABS
INDIA PVT LTD

Accreditation

Manufactured & Marketed by
Thiruppugazh Nutrabioceticals Pvt Ltd

Factory Address

355,356, Alathur, Trichy - Thogamalai Road, Karur District, Tamilnadu.

Thiruppugazh

Nutrabioceticals Pvt Ltd

POULTRY & ANIMAL HEALTH CARE

Envision Advanced Nutrabioceticals

ABOUT US

• Thiruppugazh Nutrabiocuticals Pvt Ltd is a subsidiary of Microcore research laboratories India Pvt Ltd, The pioneer in arthritits and osteoporosis product ranges.

• Our Company was incorporated with the objective of manufacturing of nutrabiocuticals for animal health care

VISION

To produce highly innovative food supplements for the animal healthcare.

MISSION

To explore the discovery of nature's best possible food supplements and manufacture highly potent nutraceuticals.

PRODUCTS RANGE

- ❖ ALLBERIN
- ❖ BOWELCURE (Probiotics)
- ❖ CRD-PROTECT (Phyto-Nutra-Poultry)
- ❖ D-WORMLACTO (PhytoNutra for Deworming & Boost healthiness & milk)
- ❖ NUTRAMINERALS (Key Minerals)
- ❖ NECROZYME
- ❖ NATURAL EGG SHELL STRENGTHENER (NESS)

ALLBERIN

Allberin is the combination of Allicin and gingerberin

Advantages

- ◆ Protects and prevent broad ranges of microbial infection
- ◆ Natural anti-microbial agent
- ◆ Best alteranative for antibiotic.

BOWELCURE (Probiotics)

(GUT ENHANCER & LITTERS CONDITIONER)

Each gram of Bowelcure Contains

- ◆ 100 million cfu of *Saccharomyces boulardii*
- ◆ 100 million cfu of *Lactobacillus sporogensis*.

ADVANTAGES

- ◆ Promotes solid litters and recover from liquid litters.
- ◆ Treat, prevent and protect from Diarrhea & reduce digestive upsets.
- ◆ Helps to reduce odors and flies.
- ◆ Ensure healthy and balanced gut micro-flora.
- ◆ Boost overall healthiness and immunity.
- ◆ Ensure better growth and increases survival rate.

DOSAGE

- ◆ 3-4 gms /100 birds in ~ 20 liters of water.
- ◆ Soaked for minimum 4 hrs in water before feeding.
- ◆ 2.5 gm for small animal
- ◆ 5 gm for Large animal

CRD-PROTECT (Phyto-Nutra-Poultry)

CRD (CHRONIC RESPIRATORY DISEASE) is caused by various microorganisms mainly by

Mycoplasma gallisepticum, Streptococcus E.coli and other sub clinical infections.

ADVANTAGES

- ✦ Unique blend of active molecules from plant origin.
- ✦ Processed herbs without losing the active molecules.
- ✦ To boost immunity and protect the birds from chronic respiratory disease of bacterial and viral origin
- ✦ Enhance the immunity of the birds.
- ✦ CRD PROTECT is purely herbal based formulation that protect from CRD and boost overall immunity and healthiness for birds

D-WORMLACTO

(Phytonutra for Deworming, Boost healthiness & milk)

High concentrate & blends of traditional herbs by solvent & enzymatic process

To improve the enhancement of milk yield and de-worming of intestinal worms.

Contains active ingredients of herbal products, natural precursors of vitamins, carotenoids and minerals.

It contains both soluble and insoluble form of the active molecules.

Advantages

- ◆ Reduces acidity, Corrects non-specific anorexia, Improves appetite, feed intake & milk yield, Helps to remove the worms.

Feed Mix

- ◆ Can be added to liquid and solid feeds.

Rate of addition

- ◆ 5 gm / big animal/ day for 7 days
- ◆ 2.5 gm / small animal/ day for 7 days.
